VARIANCE APPLICATION

Note: The following excerpt from the Land Development Code outlines the criteria for consideration in the granting of a variance to any provision therein. Underlined items are especially significant:

A. Initial Determination.

The Planning Commission shall first determine whether the need for the proposed variance arises out of the physical surroundings, shape, topographical condition, or other physical or environmental conditions that are unique to the specific property involved. If so, the Planning Commission shall make the following required findings based on the granting of the variance for that site alone. If, however, the condition is common to numerous sites so that requests for similar variances are likely to be received, the Planning Commission shall make the required findings based on the cumulative effect of granting the variance to all who may apply.

B. Required Findings.

The Planning Commission shall not vary the requirements of any provision of this Code unless it makes a positive finding, based on substantial competent evidence, on each of the following:

1. There are practical or economic difficulties in carrying out the strict letter of the regulation.
2. The variance request is not based exclusively upon a desire to reduce the cost of developing the site.
3. The proposed variance will not substantially increase congestion on surrounding public streets; the danger of fire; or other hazards to the public.
4. The proposed variance will not substantially diminish property values in, nor alter the essential character of, the area surrounding the site.
5. The effect of the proposed variance is in harmony with the general intent of this Code and the specific intent of the relevant subject area(s) of the Code.

C. Imposition of Conditions. In granting a development approval involving a variance, the Planning Commission may impose such conditions and restrictions upon the premises benefited by a variance as may be necessary to allow a positive finding to be made on any of the foregoing factors, or to minimize the injurious effect of the variance.
